FINANCIAL STATEMENTS

3. Retirement allowances and other employee future benefits

The Council provides retirement allowance and pension benefits to its employees. Retirement allowances are provided to certain qualifying employees. The benefits are provided under a final pay plan. The costs of benefits earned by employees are charged to expenses as services are rendered. The costs are actuarially determined using the projected benefit method and reflect management's best estimates of the length of service, salary increases and ages at which employees will retire. In addition, adjustments arising from plan amendment, changes in assumptions, and the actuarial present value of the accrued entitlement as at January 1, 2000 are being amortized to expenses on a straight line basis over the expected average remaining service life of the employee group. Actuarial gains and losses are recognized in income immediately.

In addition, one employee is entitled to enhanced pension benefits. The plan is based on final pay and is indexed. The cost of the benefits earned by the employee is charged to expenses as services are rendered. The cost is actuarially determined using the projected benefit method and reflects management's best estimate of salary increases and the age at which the employee will retire.

4. Statement of cash flows

A statement of cash flows has not been presented in these financial statements as no additional useful information would be provided by its inclusion.
